*Notes from Dr. B.*

## **NOT the OLD FASHIONED Way**

Very often parents believe that starting early with orthodontic care will save them money later and be better for their child. The old fashioned belief that starting early with an appliance will mean the you won't have to have braces later. Sadly, that is very rarely the case! With the new technology waiting makes more sense. It is quicker, less painful, and cheaper than the two phase treatments of old. Orthodontics has progressed a long way from the outdated early treatment model of the past!

## Calendar

**Do you have a date that you would like to see in our calendar? Tell us.**
